GENERAL FUNCTIONS

- **16 Channels**
16 communication channels provide flexible channel assignment among different user groups.
- **Busy Channel Lockout (BCLO)**
BCLO is used to prevent the interference with the on-going conversation. If BCLO is ON the radio could not transmit on the busy channel.
- **Time-out Timer (TOT)**
When TOT is ON and the transmission exceeds the preset time limit, the radio will stop transmitting after warning tone. TOT can prevent the radio from any potential damage caused by overlong transmission.
- **PC Programmable**
With the optional programming cable, the parameters could be configured through PC software.
- **Wired Clone**
To quickly set the parameters on a radio, you can clone the radio data from another radio with the supplied cloning cable, saving the time of parameter setting.
- **Low Battery Alert**
When the battery power is low, the working status indicator flashes red, reminding you to recharge or replace the battery.
- **Channel Spacing Selectable**
Different channel spacing 25 kHz / 20kHz / 12.5 kHz is optional to conform with the regulations of different countries.
